PROFESSIONAL SUMMARY

Software QA Engineer with 2 years of experience in web application testing, API validation, database verification, and business logic testing. Combines that QA work with a backend background in Laravel and RESTful APIs. Experienced in identifying defects, validating financial transactions, designing test scenarios, and ensuring data integrity.

The 2 years run from November 2024 to the present, at Rounds and Peacock Concierge. Earlier roles were software development.

SKILLS

Manual testing: Functional, regression, smoke, and sanity testing; test cases and scenarios; bug reporting; edge-case and business-logic testing.

API testing: Postman, REST APIs, HTTP methods, status codes, JSON validation.

Database testing: MySQL, SQL queries including SELECT, JOIN, and GROUP BY, data-integrity checks.

Automation: Selenium WebDriver, TestNG, Maven, Allure Reports. Foundational level, practiced on a team training project.

Tools: Jira, Trello, Git, GitHub, Postman.

Development background: PHP, Laravel 7-10, JavaScript, HTML, CSS, Bootstrap, jQuery.

QA EXPERIENCE - 2 YEARS

Software QA Engineer, Peacock Concierge Feb 2025 - Present

Kuwait

- Test web and API modules for a Laravel product used by web and mobile clients, including regression passes before release.
- Validate REST APIs in Postman, checking methods, status codes, JSON responses, and third-party integrations such as SMS gateways.
- Verify database integrity and financial transaction and wallet calculations with SQL.
- Document defects, retest fixes with developers, and use Git to follow the change under test.

Software QA Engineer, Rounds Nov 2024 - Jan 2025

Saudi Arabia

- Functionally tested admin dashboard features and checked business rules before release.
- Validated APIs and ran smoke tests after production updates on rounds.run/admin.

EARLIER DEVELOPMENT EXPERIENCE

Full-stack Developer, Rounds Aug 2023 - Oct 2024

Saudi Arabia

- Built a Laravel 7 web application with HTML, CSS, and JavaScript, including the admin dashboard at rounds.run/admin.
- Integrated third-party APIs and deployed with Hostinger and cPanel.

Full-stack Developer, Money Master Jan 2022 - Mar 2023

Maadi, Cairo

- Built Laravel 9 APIs for user management and financial transactions, and an admin panel with Laravel and Bootstrap.
- Deployed and configured the application on Hostinger and cPanel.
- Checked financial transactions against API responses and database records while building those flows.

Backend Intern, Orange Feb 2022 - Mar 2022

- Built an API for the ODC Learning System and an admin panel using Laravel 8.
- Functionally tested API behavior and admin-panel flows as part of that internship delivery.

QA PROJECT

OrangeHRM - Manual Testing and Test Automation 2025

Team contributor, DEPI graduation project. Repository owner: Youssef Zaafan. Not my independent project.

https://github.com/youssefzaafan/DEPI-Graduation-Project/

- Contributed login page objects, login test cases, a TestNG data provider, dashboard page updates, Maven configuration, and documentation edits.
- Tools used in the team project: Selenium WebDriver, TestNG, Maven, Allure Reports, Jira, Git, and GitHub.
- The team tested OrangeHRM modules including Login, Admin, PIM, My Info, and Leave, with manual test cases and bug reports.

EDUCATION

BSc Accounting, Very Good - Cairo University, Giza Sep 2014 - May 2018

CERTIFICATIONS AND TRAINING

- DEPI - Software Testing, June 2025 - December 2025.
- ITI - Full Stack Web Developer using PHP, completed February 2022.
- ITI - Software Development Fundamentals, completed August 2021.
- NTI - Web Development using PHP, MySQL, and Laravel, completed March 2021, score 98%.
- NTI - Web Design, completed November 2021, score 96%.
